

Hi Erika,

Well, our lovely new kitchen is just about completed and Terry & I are delighted with the outcome. The Oregon timber desk tops and window sills and are still under manufacture which should be ready in next few weeks but the kitchen looks fantastic anyway - see pics.

...

The colour selections certainly are lovely and as you can see, allowing Terry to add just that bright piece of colour here and there, the kitchen appears to be an integral piece of the house - perfect result indeed and exactly the overall effect we were looking to achieve with your assistance.

We are off to take in a Smeg cooking class next week and so far the appliances are working to perfection (plenty of great meals coming up !).

Last week we did a complete inventory of all cutlery, crockery and cooking gear so off to Peters Of Kensington where we almost completely replaced the old stuff with new Induction friendly cooking essentials and associated equipment !! good fun.

Thank you again for your great suggestions and design input - we are 100% happy with result.

...

Best regards Brian & Terry Norman.
